Dale Krahn, AIA, A Seasoned Architect With 30 Years Of Experience Designing Education Facilities, Joins HMC's San Jose Team

SAN JOSE, Calif., March 2008 — Dale Krahn, AIA, a well-versed architect with three decades of experience serving the needs of a wide variety of private and institutional clients across California, has joined HMC's San Jose team as an associate and senior project manager.

"Dale brings significant K-12 and college design experience to our firm," said Lee Salin, HMC Regional Vice President and COO. "He is highly regarded by school and college administrators throughout Northern California for his design expertise and experience in project management."

Krahn has facilitated the development of the design and managed construction of numerous K-12 schools and college facilities, including the \$15 million Aptos High School Performing Arts Center and Gymnasium; the \$77 million Bellevue Area High School in Merced; the \$55 million expansion of Livingston High School and the \$31 million reconstruction of San Mateo High School. For the \$198 million North Tower Replacement Hospital at Santa Clara Valley Medical Center, Dale served as project manager for Sugimura & Associate's office—in joint venture with Anshen+Allen—focusing on the development logistics center, the radiology and pediatrics departments, and the expansion of the central plant.

Since joining HMC in January, Krahn has become integral to several school projects including a master plan for Hollister School District in Hollister, Calif., programming and planning for renovations at Foothill College in Los Altos Hills, and various design projects for Scotts Valley High School in Scotts Valley, Calif.

Krahn built his reputation for putting the client's needs first working for two Bay Area firms, BCA and Sugimura & Associates.

Throughout its history, HMC Architects has established a reputation as an award-winning design firm and thought leader for education, healthcare, and government facilities. Founded in 1940, HMC is one of the largest planning and design firms headquartered in California, with offices strategically located throughout the West.
