

**Leadership
Award**

2014

Concept/

This object is comprised of 6 pieces: a concrete foundation and (5) 6” magnetic rods representing the 5 guiding principles. The sculpture is meant to be aesthetic but also encourage interactivity and creativity.

Size /

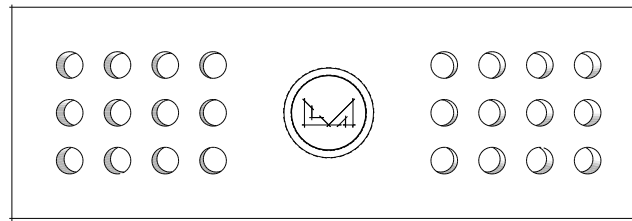

When delivered (with magnetic bars nested inside) the dimensions are 7.125” x 2.375” x 1.125”.

When assembled the sculpture will roughly be 7.125” x 7” x 2.5” (depending on how recipient chooses to construct their object).

Construction /

This award will be constructed through a three step process. *First* the model will be 3D printed to create a master prototype. *Second* the master prototype will be used to create a silicone mold. *Finally*, the silicone mold will provide a means to create the base of the sculpture using concrete. While each sculpture will remain the same in shape the use of concrete allows for each piece to be unique from the rest.

The magnetic rods will be sourced from an online retailer.
